SUMMARY

Electronics & Communication Engineering student at SMVIT, Bengaluru (CGPA: 8.4, graduating 2027) with hands-on experience in Android and Web development. Built real-world Android apps in Kotlin, Jetpack Compose & Firebase including a real-time chat platform and a cloud-synced blog system. Developed a production-ready NGO website during internship at InAmigos Foundation using HTML5, CSS3 & JavaScript. Proficient in C++ with a strong foundation in DSA. Certified in Android & Kotlin Development, Generative AI, and Business Analysis by Microsoft & LinkedIn. Seeking roles in Android Development, Software Engineering, and Full-stack Web Development.

EDUCATION

Sir M. Visvesvaraya Institute of Technology

2023 - 2027

B.E. in Electronics and Communication Engineering | CGPA - 8.4

Bengaluru, Karnataka

EXPERIENCE

Web Development Intern | InAmigos Foundation

June 2026 - July 2026

Web Developer

Remote

- Designed and developed a fully responsive NGO website using HTML5, CSS3 & JavaScript with hero slideshow, animated counters, and mobile-first layout
- Conducted a 7-page UX audit of the live website, identifying 13 issues including a critical security vulnerability across 7 pages
- Created a Figma feature proposal board highlighting 5 key NGO website improvements with annotated UI mockups
- Utilized AI-powered tools to accelerate web development workflows and deliver production-ready output

TECHNICAL SKILLS

Languages: Kotlin, Python, JavaScript, C, C++

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Problem Solving

Backend Development: Node.js, Express.js, MongoDB, JWT

Mobile Development: Android Development, Jetpack Compose, Firebase, Realtime Database, XML

Data Analysis and ML: Pandas, NumPy, LightGBM, Feature Engineering

Business and AI Skills: Requirements Gathering, Process Mapping, Generative AI, Prompt Engineering, LLM Integration, API Integration

PROJECTS

InterviewGen | AI Interview Prep Platform | MERN Stack, Gemini API, JWT

2026

- Integrated Google Gemini API to evaluate resumes against job descriptions and generate match scores, skill-gap analysis, interview questions, and personalized learning roadmaps.
- Implemented a React frontend and Node.js/Express REST API for resume submission, AI report generation, and retrieval of previously generated interview reports.
- Secured user sessions with JWT stored in HTTP-only cookies, persisted reports in MongoDB, and implemented resume uploads with Puppeteer-based PDF generation.

- Developed a two-stage food add-on recommendation system that retrieves 50 candidate items via co-occurrence patterns, then ranks them with LightGBM to serve top-8 suggestions in under 300ms.
- Integrated Google Gemini to analyze cart completeness, detecting missing meal components and dynamically adjusting add-on recommendations.
- Extracted 34 features across cart state, item attributes, and user context; improved AUC-ROC from 0.753 (baseline) to 0.793 with an estimated Rs. 449 lift per session and 21% recommendation acceptance rate.

- Designed a double-entry ledger architecture where account balances are derived from immutable credit/debit entries instead of a stored mutable field, mirroring real banking audit-trail patterns.
- Guaranteed atomic fund transfers using MongoDB sessions/transactions, ensuring debit, credit, and status updates either fully commit or fully roll back.
- Introduced idempotency-key deduplication to prevent duplicate transfer processing on client retries or network failures.
- Secured JWT-based authentication with a token-blacklist collection (TTL-indexed), ensuring logout reliably invalidates tokens server-side.

- Built a global article feed with live like counts and cloud-synced data via Firebase Realtime Database.
- Architected a bookmarking system to persist and retrieve articles across sessions using structured Firebase Realtime Database logic.
- Optimized UI performance using Glide for image rendering and Coroutines for asynchronous data fetching.
- Streamlined navigation by implementing Parcelable data passing and high-performance content rendering with NestedScrollView.
